

# 2016 Annual Report

Dear Friend,

Every day I am amazed and humbled by the people and organizations that come alongside us to end hunger and malnutrition. In this report you'll see how our collective passion equals progress.

Last year we fed a record number of people in need, both here and abroad. We responded quickly to Hurricane Matthew, shipping 540,000 meals to Haiti immediately following the storm. New partners brought our attention to nutritional needs of children orphaned by the AIDS epidemic in Lesotho, a country in Southern Africa.

**In 2017 our goal is ambitious - reach 2.7 million people with our Nutri-Plenty® Meal.** With your support I know we can give them the *life changing nutrition* they so desperately need.

Sincerely,

Larry Moore, Executive Director

PACK AWAY

# THE FACES OF HUNGER & MALNUTRITION

Each and every day, more than 8,000 children die of hunger related causes. Those who survive face chronic illness, stunted growth, and limited opportunities to learn and prosper.

## UNITED STATES

**United States:** 13.1 million children live without regular access to food.

## HAITI

**Haiti:** One in three children is stunted, or irreversibly short due to acute malnutrition.

## GUATEMALA

**Guatemala:** Nearly HALF of the population faces chronic malnutrition.

## LESOTHO

**Lesotho:** An estimated 360,000 children are orphaned and more than 550,000 children face severe malnutrition and stunting.

# NUTRITION IS OUR NUMBER ONE PRIORITY

Our first priority is distributing the most nutritious meal possible. Our Nutri-Plenty® Meal is scientifically proven to offset the effects of malnutrition in young children. Each meal contains powerful Mathile M+ Micronutrients™, soy for protein, rice and dried vegetables. It is easy to prepare, requiring only boiling water, a pot and a spoon.

## The Nutri-Plenty® Meal

Nutri-Plenty® for lunch in Guatemala

Plates of Nutri-Plenty® in Haiti

## Critical nutrients in the Nutri-Plenty® Meal:

Nutrient	Essential For	Deficiencies Cause
Iron	Red Blood Cell Production	Learning Problems
Zinc	Proper Immune System Function	Red Blood Cell Production
Vitamin A	Good Vision	Blindness
Vitamin B12	Nerve Regeneration	Paralysis
